The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. This communication is responsive to <u>Appeal Brief filed on 6/14/04</u> .			
2. The allowed claim(s) is/are <u>27-38</u> .			
3. The drawings filed on <u>09 March 2001</u> are accepted by the Examiner.			
4.

## **DETAILED ACTION**

1. Applicant's arguments, see Appeal Brief, filed on 6/14/04, with respect to the merits of Takei et al, have been fully considered and are persuasive. The rejections of Takei et al have been withdrawn. Upon further consideration by the examiner, Takei does not teach ablative etching the heat treated coated block to form unmetallized areas that are recessed into the block of ceramic material, or to form unmetallized recessed areas on the block.

## Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach all of the limitations of the claimed invention including heat treating the coated block, then subsequently ablatively etching the heat treated coated block to form a pattern of metallized and unmetallized areas that are recessed into the block of ceramic material, or to form a pattern of unmetallized recessed areas on the block.

The examiner notes that the closest prior art reference is directed to Phillips et al (U. S. Patent 5,162,760). Phillips discloses a process that includes: forming a block 14 of ceramic material that has holes 20, 22; covering the block with a conductive coating; and ablatively etching the heat treated coated block to form a pattern of metallized and unmetallized areas on the block, with the unmetallized areas forming a recess in the block of material. However, Phillips nowhere mentions any heat treating whatsoever, much less any heat treating subsequent to coating the block with a conductive coating. To modify Phillips by including a heat treating step would destroy the block material of Phillips.

Accordingly, Claims 27-38 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Dexter Tugbang whose telephone number is 703-308-7599. The examiner can normally be reached on Monday - Friday 7:00 am - 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
